Thermal Manikin
Technical Specifications

S. No.	Thermal Mankin Analyzer for Garment Testing.	Yes / No
1.	Thermal manikin designed for clothing and environmental testing	
2.	Full body manikin for enhanced garment testing	
3.	The garment test manikin should be designed in accordance with ASTM and ISO standards to meet garment evaluation research needs. It has to provide data to users researching apparel and outdoor gear. While standard 30-zone model satisfies the general garment or environmental testing needs, the system should be customized for faster transient response, greater ambient range, or fitted for other research capabilities. Additionally, the thermal manikin should also have the option for a sweating system, with fluid distribution system, reservoir, and wicking fabric skin layer foreven greater flexibility in the testing environment.	
4.	Mankin should have Articulated joints and embedded elements for added usability Constructed using 3D CAD modeling and a thermally conductive carbon-epoxy shell with embedded heating and sensor wire elements, thermal garment test manikin should be fully articulated, providing motion at the shoulders, elbows, hips, knees, and ankles for a variety of poses. All manikins should be supplied with a laptop PC with Control Software, providing full device control, fault detection, data logging and analysis capabilities.	
5.	Sweating Skin System - The fluid pump and supply tubing deliver water to a network of pores over the surface of the manikin. The removable fabric skin layer evenly distribute water on the surface of the manikin by wicking action.	
6.	Thermal Resistance - Thermal resistance (R_{ct}) of test samples is determined during dry tests by measuring the heat flux through the garment after steady-state conditions to be achieved. The control software to provide precision control to maintain the manikin at any temperature setting within the system's range. Control to monitor the power required to maintain the manikin temperature and automatically calculates R_{ct} of the garment ensemble.	
7.	Evaporative Resistance - Evaporative resistance (R_{et}) of test samples to be determined during sweating tests by measuring the heat flux as water vapor is driven through the test garment. Control Software monitors the power required to maintain the manikin temperature during evaporation and automatically calculates the R_{et} of the garment ensemble.	
8.	Thermal manikin with at least 30 independent thermal zones	
9.	Embedded distributed sensor wire temperature sensing	
10.	Embedded distributed heater wire temperature control	
11.	Carbon-epoxy or composite shell m	
12.	Microprocessor zone controllers	
13.	Ambient sensors: at least 2 temperature, 1 wind speed, and 1 RH sensors	

14.	Temperature sensor elements to have distributed over each zone and should be protected by an epoxy coating.	
15.	Volumetric control of delivered sweat rate.	
16.	Network of at least 130 sweat pores over the surface of the manikin.	
17.	Removable fabric skin layer for water distribution by wicking.	
18.	Data output to csv files	
19.	Temperature measurement accuracy +/- 0.1degC, resolution +/-0.01degC	
20.	Minimum 700W/m2 heat loss power	
21.	ASSOCIATED TEST METHODS ASTM F1291ASTM F1720 ASTM F2370 ASTM F2371 ASTM F2732 EN 13537EN ISO 23537 (Part 1)ISO 15831	
22.	Mainkin Transport Wheelchair to be included	
23.	Walking Motion Stand to be part of system	
24.	Operational Temperature Range :-20 to 50°C	
25.	Operational Humidity Range : 0 to 100% RH (including condensation)	
26.	Operational Wind Speed Range : 0 to 2.5 m/s	
27.	Heater Voltage : 48 volts	
28.	Nominal maximum heat flux : 800 W/m2	
29.	Flow rate : 0 to 1000 ml/hr/m2	
30.	Nominal Shirt Size : Medium	
31.	Nominal Pants Size : 29 W x 30 L	
32.	Computer latest version for all support programming & printer

5. TECHNICAL & FINANCIAL BID OPENING AND EVALUATION PROCEDURE

The e-bids received shall be assessed and evaluated based on the qualification criteria. An evaluation committee will undertake the screening of all the tenders based on the Eligibility/Qualification criteria for technical bid. The bidders must meet all pre-qualifying criterions. Any agency not meeting any of the requirements for technical bid will not be short-listed for the opening financial Bid.

A-The bids shall be evaluated on the basis of final landing cost which shall be arrived as for inland transportation, insurance and other local services required for delivering the goods at the desired destination. iv. The installation, commissioning and training charges.

B-Purchase preference shall be given to all local suppliers in all procurements undertaken by the purchaser in the following manner: (i) Among all qualified bids, the lowest bid will be termed as L1. If L1 is from a local supplier, the contract for full quantity will be awarded to L1. (ii) If L1 bid is not from a local supplier, 50% of the order quantity shall be awarded to L1. Thereafter, the lowest bidder among the local suppliers, will be invited to match the L1 price for the remaining 50% quantity subject to the local supplier's quoted price falling within the margin of purchase preference of 20%, and contract for that quantity shall be awarded to such local supplier subject to matching the L1 price. In case such lowest eligible local supplier fails to match the L1 price or accepts less than the offered quantity, the next higher local supplier within the margin of purchase preference shall be invited to match the L1 price for remaining quantity and so on, and contract shall be awarded accordingly. In case some quantity is still left uncovered on local suppliers, then such balance quantity may also be ordered on the L1 bidder. (iii) If the tendered item is not divisible the following procedure of evaluation shall be followed: a) Among all qualified bids, the lowest bid will be termed as L1. If L1 is from a local supplier, the contract will be awarded to L1. b) If L1 is not from a local supplier, the lowest bidder among the local suppliers, will be invited to match the L1 price subject to local supplier's quoted price falling within the margin of purchase preference of 20%, and the contract shall be awarded to such local supplier subject to matching the L1 price. c) In case such lowest eligible local supplier fails to match the L1 price, the local supplier with the next higher bid within the margin of purchase preference shall be invited to match the L1 price and so on and contract shall be awarded accordingly. In case none of the local suppliers within the margin of purchase preference matches the L1 price, then the contract may be awarded to the L1 bidder.

6. RESOLUTION OF DISPUTES

In all the matters concerned to and not covered in the terms & conditions, the decision of the Principal Director, MSME-TDC (PPDC), Meerut shall be final and binding on the parties. However, any dispute or difference arising in interpretations or applications of provisions of the contract, shall be referred to the sole arbitration of the Additional Secretary & Development Commissioner (MSME) / Chairman, G.C., MSME-TDC (PPDC), Meerut, Ministry of Micro Small & medium Enterprises, Govt. of India, 7th Floor, Nirman Bhawan, Maulana Azad Road, New Delhi 110108 or any other person appointed by him.
